

**MICROSOFT OEM SYSTEM BUILDER LICENSE**  
(Visit [www.microsoft.com/oem](http://www.microsoft.com/oem) for additional OEM system builder information)

- 1. AUTHORIZED DISTRIBUTION AND ACCEPTANCE.** Distribution of individual software licenses or hardware units contained in this Microsoft System Builder Pack ("package") is not authorized unless you accept this license. You accept this license when you open this package. By accepting this license, you agree that you are a system builder. "System builder" means an original equipment manufacturer, or an assembler, reassembler, or installer of software on computer systems. If you choose not to accept this license, promptly return the unopened package to your distributor. Individual software licenses or hardware units cannot be returned after this package is opened.
- 2. PARTIES.** This license is granted to you by Microsoft Licensing, GP ("MLGP"), a Nevada corporation, unless you are located in Europe, Africa, or the Middle East (for a complete list of countries, consult [www.microsoft.com/oem/sblicense](http://www.microsoft.com/oem/sblicense)), in which case this license is granted by Microsoft Ireland Operations Limited. ("MIOL"), an Irish company. The terms "we," "our," or "Microsoft" are used below to mean either MLGP or MIOL, as appropriate.
- 3. LIMITED LICENSE.** This is a limited license to distribute the individual software licenses or hardware units contained in this package. "Individual software license" means any individual software license that comes in this package, including software media, documentation, certificates of authenticity, end-user license agreements, and security devices. "Hardware unit" means any hardware that comes in this package, including any hardware-related software and user documentation.
- 4. SOFTWARE DISTRIBUTION.**
  - 4.1 If the individual software license is a desktop operating system (including Windows XP Media Center Edition), we grant you a nonexclusive right to distribute individual software licenses; provided that each one is distributed with either (a) a fully assembled computer system or (b) a nonperipheral computer hardware component. A "fully assembled computer system" means a computer system consisting of at least a central processing unit, a motherboard, a hard drive, a power supply, and a case. A "nonperipheral computer hardware component" means a component that will be an integral part of the fully assembled computer system on which the individual software license will be installed.
  - 4.2 If the individual software license is application or server software, we grant you a nonexclusive right to distribute individual software licenses; provided that each one is distributed with a fully assembled computer system.
  - 4.3 Each individual software license must be distributed pursuant to the end-user license agreement ("EULA") that accompanies the individual software license. Under the terms of the EULA, you are the licensor.
- 5. HARDWARE DISTRIBUTION.** If this package contains hardware units, we grant you a nonexclusive right to distribute each hardware unit only with either (a) a fully assembled computer system or (b) other non-Microsoft computer hardware component. If you distribute a hardware unit with a fully assembled computer system, you must preinstall the associated software drivers and programs supplied in this package, if any, on the fully assembled computer system's hard drive. Neither Microsoft, its affiliates, nor its distributors or suppliers makes any warranty regarding compliance of the hardware units with any federal, state, provincial, or local laws or regulations, or the laws or regulations of any non-U.S. jurisdiction, relating to computing devices or items sold to the public. You have the sole responsibility to assemble, test, and certify the hardware units in conjunction with other equipment that you manufacture, distribute, or sell.
- 6. DISTRIBUTION OTHER THAN WITH A FULLY ASSEMBLED COMPUTER SYSTEM.** We grant you a nonexclusive right to distribute individual software licenses for desktop operating systems or hardware units to another system builder if the software and hardware are distributed with a nonperipheral computer hardware component; provided that the other system builder accepts this license. A copy of this license is posted at [www.microsoft.com/oem/sblicense](http://www.microsoft.com/oem/sblicense) to facilitate its acceptance by the other system builder. You are required to keep records of any distributions pursuant to this section to show that its requirements were met.
- 7. PREINSTALLATION REQUIREMENT.** If you distribute a desktop operating system with a fully assembled computer system, you must (a) preinstall it on the computer system's hard drive and (b) use the OEM Preinstallation Kit ("OPK") provided in this package, if any. Preinstallation is limited to one copy of each individual software license. You may not copy or modify the OPK or OPK instructions provided in this package, if any. You may not distribute the OPK or OPK instructions to an end user. For updates regarding OEM preinstallation tools and support, see [www.microsoft.com/oem](http://www.microsoft.com/oem). If you distribute a hardware unit with a fully assembled computer system, you must preinstall the associated software drivers and programs supplied in this package, if any, on the fully assembled computer system's hard drive.
- 8. CERTIFICATE OF AUTHENTICITY (COA) LABEL/ PROOF OF LICENSE (POL) LABEL.** If the individual software license includes a COA or combination COA/POL label, the system builder who installs the individual software license must attach the COA or combination COA/POL label, as applicable, to the outside of the fully assembled computer system case in an easily accessible location.
- 9. END-USER SUPPORT.** The system builder who installs the individual software license and distributes hardware units must provide end-user support on terms at least as favorable as the terms under which the system builder provides end-user support for any fully assembled computer system. The system builder must place its support phone number in a noticeable location in the fully assembled computer system help files or end-user documentation.

**10. DISCLAIMER OF ALL WARRANTIES.** Unless mandatory under applicable law despite this provision, Microsoft, its affiliates, and their distributors (and their suppliers) disclaim and exclude all warranties, conditions, and representations (express or implied, by statute or otherwise) in relation to the individual software licenses and hardware units, including, without limitation, warranties and conditions of title, merchantability, satisfactory quality, nonfringement, fitness for a particular purpose, or any implied warranty or condition arising from course of dealing or usage of trade.

**11. LIMITATION OF LIABILITY.** You agree that Microsoft, its affiliates, and their distributors (and their suppliers) will not be liable for any damages (including any caused by negligence) related to this license or any transaction contemplated herein, including for any consequential, incidental, indirect, economic, or punitive damages even if Microsoft, its affiliates, distributors (or their suppliers) have been advised of the possibility of such damages. You acknowledge and agree that this limitation of liability shall apply even if any remedies fail of their essential purpose. Your and our total liability for direct damages related to this license or any transaction contemplated herein will be limited to 100% of the amount actually paid by you for this package.

**12. TRADEMARK RIGHTS.** You agree to comply with all trademark guidelines found at [www.microsoft.com/mscorp/ip/trademarks/oemguide.asp](http://www.microsoft.com/mscorp/ip/trademarks/oemguide.asp).

**13. EXPORT RESTRICTIONS.** You acknowledge that the individual software licenses and hardware units are subject to U.S. export jurisdiction. You agree to comply with all applicable international and national laws that apply to the individual software licenses and hardware units, including the U.S. Export Administration Regulations, as well as end-user, end-use, and destination restrictions issued by the U.S. and other governments. For additional information, see [www.microsoft.com/exporting](http://www.microsoft.com/exporting).

**14. LICENSE COMPLIANCE.** You must not engage or participate with any third party in the unauthorized manufacture, duplication, delivery, transfer, or use of counterfeit, pirated, or illegal software and you must not otherwise infringe any of our other intellectual property rights.

**15. ACTIVATION.** Under the terms of the EULA, use of the individual software license will be limited to the first (a) 30 days after the end user launches Microsoft Windows XP or Windows Server 2003 software or (b) 50 times the end user launches Microsoft Office software; unless either (i) the system builder activates the software in the manner described in its setup sequence or (ii) the end user activates the software in the manner described during its launch. You must provide the following or substantially similar notice in a clear and conspicuous manner to end users before their purchase of the software (for example, in advertisements, packaging, or point of purchase materials):

Certain Microsoft® software product(s) included with this computer may use technological measures for copy protection. In such event, you will not be able to use the product if you do not fully comply with the product activation procedures. Product activation procedures and Microsoft's privacy policy will be detailed during initial launch of the product, or upon certain reinstallations of the software product(s) or reconfigurations of this computer, and may be completed by Internet or telephone (toll charges may apply).

**16. MISCELLANEOUS.**

16.1 You must not advertise, provide a separate price for, or otherwise market or distribute individual software licenses, or any part of them, as separate items from the fully assembled computer system or nonperipheral computer component, as applicable; except to the extent necessary to advertise, set a price or fee, or otherwise market or distribute Microsoft software that you are expressly authorized by Microsoft to market or distribute as separate items from the fully assembled computer system or nonperipheral computer component, as applicable. Except as granted in this license, you may not use, run, distribute, copy, modify, display, repackage, or reassemble any individual software licenses or hardware units, or any part of them.

16.2 You are solely responsible for all applicable taxes, fees, duties, and tariffs that may be levied in connection with this license and the ordering and distributing of software and hardware under this license.

16.3 You may not reverse engineer, decompile, or disassemble any individual software license or hardware unit except and only to the extent that it is expressly permitted by applicable law notwithstanding this provision. All rights not expressly granted are reserved.

16.4 If a court holds any provision of this license to be illegal, invalid, or unenforceable, the remaining provisions will remain in full force and effect and the parties will amend the agreement to give effect to the stricken clause to the maximum extent possible.

16.5 If the contracting party to this license is MLGP, the laws of the State of Washington, U.S.A. govern this license. If the contracting party to this license is MIOL, the laws of Ireland govern this license.

16.6 Nothing in this license restricts you from supporting, promoting, distributing, or using non-Microsoft software or hardware.

16.7 Microsoft may assign this license at any time to an affiliated company.

16.8 This license does not create a "technology transfer" agreement, as defined by applicable law because (a) the technology (including any software) made available under this license is not an integrated part of a technology chain for production or management purposes and (b) the technology (including any software) will have its own technology license. You will not hold yourself out as our technology recipient and will not attempt to identify us as a technology provider under this license.

## **OEM System Builder Pack**

**For delivery to PC and server manufacturers or assemblers ONLY**

**<http://www.microsoft.com/oem/>**

### **Distribution Requirements**

<b>If this package contains</b>	<b>it must be accompanied by</b>
desktop operating system software,	either a fully assembled computer system or a nonperipheral computer hardware component (that will be an integral part of the computer system on which the desktop operating system software will be installed). The system builder who installs the desktop operating system software on the PC must also affix the Certificate of Authenticity label to the exterior of the computer case.
application or server software,	either a fully assembled computer system or server. The system builder who installs server software on a server must also affix the Certificate of Authenticity label to the exterior of the computer case.
hardware,	either a fully assembled computer system or non-Microsoft computer hardware component.

The installer of the software must provide end-user support.

Individual units inside this package may not be delivered unless accompanied by the required hardware as listed above; provided, however, that this package may be redelivered unopened and unaltered.

For further details and complete requirements, please review the Microsoft OEM System Builder License on the opposite side of this package.
